

Ballot

x	y	z
---	---	---

- **numFields**: number of fields per ballot (in this case, **numFields** = 3).
- **uniqueValues** = $\begin{cases} \text{true} : x, y, z \text{ must be different.} \\ \text{false} : x, y, z \text{ can be different.} \end{cases}$
- **minValue** $\leq x, y, z \leq$ **maxValue**
- **minValueSum** $\leq x^{\text{costExponent}} + y^{\text{costExponent}} + z^{\text{costExponent}} \leq$ **maxValueSum**
